

THE INDUSTRY'S FIRST COMPREHENSIVE NETWORK
OFFERING "**PORT-TO-DOOR**" SERVICES FOR
CONTAINERIZED GOODS

PORT TO DOOR SERVICES

Drayage

Expert freight transportation to and from ports by independent owner-operators.

CFS/Bonded Facility

Leading provider of container freight services where goods belonging to multiple cargo owners are consolidated or deconsolidated.

Transload

Best positioned offeror of container transloading requiring robust port facilities and strong transportation capabilities.

Intermodal

Whether by rail or road, cargo is seamlessly transported to its next destination with ease.

Warehousing & Distribution

From coast to coast, our integrated network of owned and partner warehouses allows for efficient and price competitive distribution and fulfillment.

Final Mile

STG's final mile services meet the omnichannel demands of cargo owners, delivering wherever customers are located.

KEY

- Intermodal Service Locations
- 📍 Drayage Service Locations

OUR TECHNOLOGY

Cargo Manager

Shipment data, visibility and real time inventory management allow cargo owners to make decisions to rapidly fill or redirect orders across the entire ecosystem of shipment recipients.

STG Logistics and Cargo Manager, our inventory management system, work in tandem to provide a suite of solutions and total visibility to cargo up and down a supply chain.

STG Edge

- Real Time shipment visibility
- Document retrieval (POD/J1/BOL)
- Route related weather & traffic visibility
- Planned and Accomplished event details
- Sustainability Reporting
- KPI reporting
- Billing / Statement of Account Visibility

Rail Optimizer

Rail Optimizer, our proprietary intermodal management system helps drive on-time performance.

Tracks door-to-door movements of long haul freight with GPS on containers.

Manages 53-ft. owned containers, small box and drayage capacities.

Communicates constantly with railroads to proactively identify any delays

Fosters driver communication during drayage legs

Keeps shippers informed through EDI integration and an online, self-service portal
